since that time. Mr. Rue died 30 years ago.  
Sun Bros. circus and menagerie is billed to exhibit at Carrollton on Thursday, June 15. I have secured the contract to carry water for the elephants, and as Mr. L. E. Phant is largely on the water wagon I must employ some boys to help fill the contract or attach his trunk.

Last Friday's Salem Republican said "It is reported that two men from Washingtonville fishing in Pine Lake recently caught two nice large bass. A stranger came along, admired the catch and asked to take a picture of the fish. The request was granted and later the fisherman paid \$100 for catching bass out of season." Two objections can be raised to this story: Not every fisherman in Washingtonville has \$100 about his jeans; and second, he could have bought a wagon load of fish from Dave Calvin for less money. However, this is a fish story and should not be taken too seriously.

More agricultural time has been used in Carroll county this year than in any one year in the past, and we may reasonably hope to see better crops.

Gen. D. A. Hollingsworth of Cadiz, the republican, called on his way to congress from this district, said in his Decoration day speech at Canton: "To my mind a nation of one hundred millions of intelligent freemen with ample resources can never be said to be unprepared to defend its honor." The Philadelphia Telegram says "It is a whole lot easier to dodge trouble than to fight your way out of it." The word "preparedness" is a sad expression coined by the munitions makers and takes the place of last year's fad to "swat the bug."

Mrs. Sarah McBurney Kean of Carrollton has just published a neat little book of about 200 pages, entitled "Grandmother's Story." It is the history of the grandmother of her husband, Hon. R. G. Kean. The old lady lived in the neighborhood and attained the ripe old age of 98.

The book tells the story as Mrs. Kean heard the old grandmother tell it from time to time from her birth and childhood in Ireland; her home in a floorless cabin, etc. The book is illustrated with cut of the old lady, a picture of the old neighborhood, the church and graveyard. The author supplies many flights of fancy and appropriate quotations of poetry. The book is well worth reading.

Professional politicians here who have nothing else to do (and there are scores of them) are on the case of excitement over what may happen at Chicago this week. Those who mean to bluff, say that T. R. will be nominated and elected. This is about as laughable as England's threat to starve Germany. Oh, say, Bill Holt and Jim Atchison, if you are so sure of that naval engagement in the North Sea last week Wednesday? Even the Zeppelins pounded the Johnny Bulls from above, and the Germans in front and the Austrians on all sides. Score another one for John Possage.

Dr. Schall and Mr. Keister of the Delroy mining company were in Washingtonville and Leetonia last week in the interest of machinery for their coal mine. The doctor is said to be a graduate of the Indian school at Carlisle, Pa. He is much like the late Dr. Kimber, who was in Washingtonville, where he had a scrap with George Charlton and with the Lewis family. However, Dr. Schall is a boomer and a hustler, making every move count.

The 21st of this month will be the longest day of the year, the day our grandmothers planted their late cucumber seeds in order to grow the longest C-cumbers. Even now The Dispatch readers can read the paper by daylight Thursday evenings. Every family should subscribe for The Mahoning Dispatch and keep in touch with the doings and news of the county.

B. Maxwell has better crops and Dave Calvin sells more fish since they read The Dispatch and David Klingensmith can't keep house without it.

I had a conversation the other day with a native Belgian who is now a traveling salesman in this country, and naturally we talked of the present war in Europe. He is glad the German made that destructive drive through his country in the early part of the war and thinks his people will be all the better for it. He thinks the French people are better off at nations engaged in this war, but made a fatal mistake by becoming an ally of England and Russia. He thinks that if the French Republic can be allied with kingdoms and empires in time of war, they can be better allied with Germany when peace shall have been declared; this being the only way to settle the Alsace-Lorraine bone of contention. Both countries have wonderfully changed since the Franco-Prussian war—France becoming a republic and Germany becoming an empire.

Individually, I think that any German could live in peace with the Moles, the Guchemands, the Luxeueis and other French people at Washingtonville; but how about the Stumptown subjects of King George? Vive la Republique! Let us now get out our grafoni and play the Marseillaise and the Wachter am Rhine. Sic Semper Tyrannis. E Pluribus Unum and Erin go Bragh. Mike Higgins will please uncork another vital of Tom Moore, while George and David Somerville sing "Should Auld Acquaintance be forgot and never brought to mind, we'll take a cup of kindness yet for Auld Lang Syne."

PETER M. HEROLD.

Profits and Size of Farms  
"Let it be remembered that there is more profit in a large yield on a smaller area than a smaller yield on a large area. If you have a small farm it is much better to have it well-drained and fertilized so that you will get a large yield from few acres," says Abe T. Hazlerigg, Vigo County, Indiana, who believes it is possible for every farmer to grow 80 to 100 bushels of corn per acre. "Remember that the productivity of the land must be maintained and the crops furnished with plant food so that they can produce large yields profitably. Every farmer should study his soils and his crops and adapt his methods to them."

Profits and Size of Farms  
"Let it be remembered that there is more profit in a large yield on a smaller area than a smaller yield on a large area. If you have a small farm it is much better to have it well-drained and fertilized so that you will get a large yield from few acres," says Abe T. Hazlerigg, Vigo County, Indiana, who believes it is possible for every farmer to grow 80 to 100 bushels of corn per acre. "Remember that the productivity of the land must be maintained and the crops furnished with plant food so that they can produce large yields profitably. Every farmer should study his soils and his crops and adapt his methods to them."
